

TRAVERSE

If you are looking for a compact, lightweight, top-performing waterproof breathable jacket the Traverse is just what you're after. Ideal for multisport athletes, lightweight hikers and travellers.

- Fully adjustable zip away hood tucks into collar when not in use
- Hood has wired peak
- Microtherm lined collar
- Water-resistant front zip
- Internal storm flap with heat pressed drainage channel
- One welded chest pocket with water-resistant zip
- Articulated sleeves for unrestricted movement
- Reflective detailing for visibility/safety
- Adjustable hem

EXODUS

High quality waterproof breathable garments aren't just for hair-raising adventures; the Exodus is an all-round jacket for travelling and every day use. Made from 2-layer eVent fabric, it's extremely comfortable while still offering the best possible protection against nasty weather.

- Fully lined for comfort
- Fully adjustable zip-off hood with wired peak
- Microtherm lined collar
- Water-resistant front zip
- Internal storm flap
- Two hand pockets with water-resistant zips
- One internal zippered chest pocket
- Articulated sleeves for unrestricted movement
- Adjustable hem

BREATHABILITY

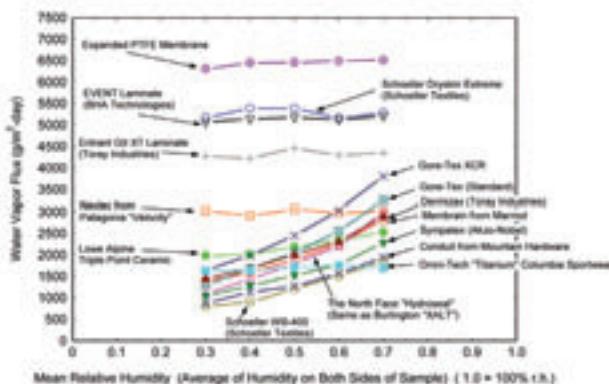

Breathability, or water vapour transmission rate (WVTR), is the ability of a fabric to transport water vapour from one side of the fabric to the other. We all sweat during high exertion; it's the natural way of cooling our body (evaporative cooling). If your sweat can't go anywhere it gets trapped in your clothing and you will overheat while exercising and get cold when you stop moving. Waterproof means nothing if your sweat can't go anywhere. If you're wet you're miserable, dry means comfort!

HOW DOES eVent™ WORK?

eVent uses an ePTFE membrane with continuous pores and has given it a unique chemical treatment to make the membrane oleophobic (oil repelling). No inhibitive PU layer is needed (unlike Gore-Tex) to maximise breathability.

Garments with a hydrophilic PU coating are breathable, but the process is significantly slower. It requires your sweat to condensate on the inner fabric face, which then needs to wick through the membrane to evaporate on the surface.

Independent tests by the US Army Soldier System Centre show that eVent moves moisture away up to 200% faster than Gore-Tex.

What the above table from the U.S. Army Soldier Systems Center clearly shows is that eVent is more breathable than any other waterproof breathable fabric available (note: Schoeller Dryskin Extreme is not a waterproof fabric, but a knitted softshell). It also shows that eVent is especially more breathable at lower humidity levels.

If moisture can be moved out of a clothing system soon after humidity begins to build (= low humidity levels), the risk of moisture vapour accumulation, condensation, and wetting of clothing underneath the shell is minimised. It also means that the garment can be worn during periods of moderate exertion levels, increasing the time at which the shell can be worn. When your exertion level lowers (slowing down or stopping for lunch for example) the internal humidity level in the garment will decrease. However eVent will continue to move moisture at a higher rate than a membrane with PU, which will ultimately contribute to faster drying times for your clothing.

MOUNTAIN

PROPHET XPD

Based on its legendary predecessors the new Prophet XPD is the bees knees for mountain adventures in any weather. Made from the most breathable waterproof fabric available, this is a serious alpine jacket; extremely durable, fully featured and ready for action!

- Fully adjustable alpine style hood (fits a helmet) with wired peak
- 2-way front zip with double storm flap
- Rear storm flap has heat pressed drainage channel
- Two chest pockets and two hand pockets with water-resistant zips
- Two internal chest pockets – one zippered, one bound
- Microtherm hand pocket bags with separate compartment for a heating gel pack
- Water-resistant pit zips for extra ventilation
- Articulated sleeves for unrestricted movement
- Moulded cuff tabs – simple to adjust, even with gloves on
- Reflective detailing for visibility/safety
- Adjustable hem and waist

MOUNTAIN / TREK

PROPHET PANTS

For full protection against rain, snow, hail and the likes you wear more than just a jacket. The Prophet Pants complete the set and will keep you dry no matter what. Features like full-length leg zips, adjustable braces and a drop seat will be appreciated in the most daring conditions.

- Fully removable adjustable braces with multiple attachment points
- Full length water-resistant leg zips
- Partial storm flap covers the lower part of the leg zip to provide greater durability
- Leg zips also have an internal zip flap with heat pressed drainage channel
- Articulated knees for unrestricted freedom of movement
- One pocket with water-resistant zip
- Snow cuff with stretch panels
- Adjustable hem
- Nylon scuff patches on the lower inside leg

TREK

HOLLYFORD

Made from robust eVent fabric, the Hollyford will keep you comfortable in the most atrocious weather conditions. In true 'Kiwi style' the jacket is extra long and features a fully adjustable hood designed to keep the weather out without obstructing your vision.

- Fully adjustable hood with wired peak
- 2-way front zip with double storm flap
- Rear storm flap has heat pressed drainage channel
- Two hand pockets with water-resistant zips
- Hand pockets are positioned so they can still be used while carrying a pack
- One 'internal' zippered chest pocket with 'external' access under front storm flap
- Articulated sleeves for unrestricted movement
- Moulded cuff tabs – simple to adjust, even with gloves on
- Reflective detailing for visibility/safety
- Adjustable hem and waist

ZEALOT

The Zealot is an excellent all-round jacket with a zip-away hood. Designed with versatility in mind; mountains, ski fields, forest or the local park... the Zealot is comfortable everywhere and will perform everywhere.

- Fully adjustable zip away hood tucks into collar when not in use
- Hood has wired peak
- Water-resistant 2-way front zip with double storm flap
- Rear storm flap has heat pressed drainage channel
- Two hand pockets with water-resistant zips
- One internal zippered chest pocket
- Articulated sleeves for unrestricted movement
- Moulded cuff tabs – simple to adjust, even with gloves on
- Reflective detailing for visibility/safety
- Adjustable hem and waist

RESOLUTION PANTS

Robust and no frills pants to keep your legs dry while maintaining maximum breathability. Quarter length water-resistant zips on the lower legs make it easy to get in and out of these without the need to take boots or shoes off.

- Microtherm lined waist band
- Webbing waist belt with side release buckle
- Quarter length water-resistant leg zips
- Articulated knees for unrestricted freedom of movement
- Adjustable hem
- Nylon scuff patches on the lower inside leg

RESOLUTION

Call it 'tramping', call it 'bushwalking' or call it 'going out for a wander'. The Resolution will keep the rain out, while the highest level of breathability will quickly deal with perspiration keeping you dry, warm and comfortable on all of your endeavours.

- Fully adjustable hood with wired peak
- 2-way front zip with double storm flap
- Rear storm flap has heat pressed drainage channel
- Two chest pockets with water-resistant zips
- Two hand pockets positioned so they can still be used while carrying a pack
- Articulated sleeves for unrestricted movement
- Reflective detailing for visibility/safety
- Adjustable hem and waist
- All-round cut with extra length to offer versatility in use
